

# ABBOTT VASCULAR

## The Green Initiative

### Our Consolidated Shipping Program

As part of Abbott Vascular's ongoing commitment to partnering with you for greater efficiency and greener operations, we have initiated a new Consolidated Shipping Program.

By combining all your daily orders into one, inclusive shipment, our "leaner, greener" shipping program allows you to . . .

- Decrease materials waste by up to 35%
- Reduce your hospital's carbon footprint
- Improve facility waste management—and lower costs
- Increase overall supply chain efficiency and savings

Transitioning to the Abbott Vascular Consolidated Shipping Program is easy—and our highly-trained personnel will ensure that no shipping delays will result from this process change.

#### Serving Customers, Saving Resources

*"The Consolidated Shipping Program works really well. It transformed our process to be more efficient—less boxes to receive, open and dispose. I'm extremely happy that we adopted this change."* Lori Greer, Supply Chain Manager at Vanderbilt University Medical Center in Nashville, TN, program participant since January 2010

**Best of all, to take advantage of the greener service and greater savings provided by the Abbott Vascular Consolidated Shipping Program, simply contact your Sales Representative for more details, and sign up today!**
